## BENEFITS

### Unified Communications

Express Virtual Meeting's Unified Communications (UC) solutions allow organisations to extend seamless, real-time collaboration into a single, easy to use interface for desktop, mobile and tablet.

By enabling quick and easy communications, Premium-UC empowers a truly collaborative workplace. Premium-UC benefits can be realised immediately with increased productivity, cost savings and workforce engagement.

### Efficiency

Increase efficiency is one of the main reasons businesses switch to VoIP, and mobile VoIP. With Express Virtual Meeting's Express Connect softphone suite, this efficiency plus cost savings is quickly realized as VoIP calls are routed through Wi-Fi and carrier data networks, taking the place of costly cellular carrier plans and long distance charges as well as giving you the ability to Bring Your Own Device (BYOD) strategies that work on over 90% of mobile devices.

### Work from Anywhere

Integrating mobile phones into an organisation's existing network, gives mobile staff members access to company telephone features that can include voice calling, messaging, presence, voicemail, call forwarding, caller ID, and Enhance existing features with IM, Presence, File Transfer and more. Premium-UC allows remote/satellite workers to connect, communicate and collaborate with wider business more effectively.

### Deploy Mobile VoIP Solutions with Ease and Efficiency

Mobile VoIP solutions are easy to deploy and manage, reducing telecommunication costs and streamlining communications. Premium-UC is a powerful, carrier-grade solution that provides the ability to set-up, move, add and change softphone endpoint provisioning settings with ease and efficiency in near real-time.
